

Alba Bioscience streamlines and improves their compliance processes with Gael

Alba Bioscience, a major bio-manufacturing organisation, has invested in [Gael's](#) Q-Pulse quality management solution (QMS) to extensively manage, and enhance, their quality compliance in line with industry best practice.

Based in one of the UK's leading biotech clusters in Edinburgh, the company are in a period of significant growth and supply vital products to hospitals, blood services and healthcare companies in over 30 countries. Investing in [Q-Pulse](#) demonstrates Alba Biosciences' on-going commitment to quality and continual improvement with benefits including an improved centralised electronic document control solution and a more effective CA/PA management process. Other significant benefits include a reduction in administration management and greater visibility of key quality sub-systems.

Robert Dorris, Director of Quality and Regulatory Affairs at Alba Bioscience, said: "As part of our on-going commitment to quality, and investment in robust systems, we committed to advancing our compliance by purchasing an electronic management system.

"Q-Pulse will provide us with a centralised management system for documentation, audits, suppliers, equipment, and non-conformances. By utilising Q-Pulse, we will consolidate numerous systems we have in place and allow accurate and real time analysis of data through its powerful analysis tool. The information that will be generated from Q-Pulse will be central in our drive for improvements in areas such as visual and KPI management.

"Alba Bioscience is delighted to have purchased Q-Pulse and implementation elevates us into industry best practice through use of a robust and effective electronic management system. We are excited about working with Gael long term and strong relationships have already been forged through a professional collaborative approach."

Notes:-

Since 1992, Scottish software company Gael have created and delivered products and services to manage quality, safety and risk. Working with clients across the life sciences, healthcare, aviation, manufacturing and services sectors, Gael helps companies overcome the challenges they face in maintaining and demonstrating compliance to internationally recognised standards and regulations.

More than 200 life science organisations worldwide including Astra Zeneca, Reckitt Benckiser, Reading Scientific Services (RSSL) and Roslin Cells, rely on Gael to help and support them in demonstrating compliance to auditors, customers, regulators and third party organisations with our Q-Pulse product.
