

We are pleased to announce the appointment of Dr Morag McFarlane as Chief Executive Officer of Tissue Solutions Ltd.

Morag has served for the past seven years as Chief Scientific Officer at Tissue Solutions Ltd, and this promotion is in recognition of her exceptional performance in building the company. Morag's new role will focus on further developing and implementing the vision and strategy for the business, and leading the senior team. Morag said, "I am really pleased and excited to accept this position. Tissue Solutions has continued to grow beyond expectations since we set it up in 2007 and it is a privilege for me to be able to lead the company as it moves into the next exciting phase of its development. I am really looking forward to the challenges ahead and to continuing to help our clients source biomaterials for their research projects." Morag has taken up the appointment with immediate effect.

Tissue Solutions Ltd (www.tissue-solutions.com) is a specialist tissue procurement and management service based in Glasgow. Tissue Solutions works to supply ethically acquired and fully consented quality human tissue to pharma, biotech and CROs worldwide. They specialise in 'hard to source' tissues such as fresh samples or those with specific inclusion and exclusion criteria. Formal alliances with specialist companies allow them to offer tissue related services including IHC/histology, human primary cell line establishment plus pancreatic islet and biomarker studies.
